Summary

Purpose of report

The Solvency II regulations came into effect on 1 January 2016 and require new reporting and public disclosure arrangements to be implemented by insurance companies within the European Union. This document is the first version of the Group Solvency and Financial Condition Report (“SFCR”) that is required to be prepared annually by the group which comprises Colonnade Insurance S.A. (“the Company”) and its subsidiary, TIG (Bermuda) Ltd. (“TIG Bermuda” and together “the Group”).

A. Business and Performance

As TIG Bermuda has not written any (re)insurance business for the last number of years, this section summarises how the Company operates and how it has performed since commencing underwriting operations through branches established in Hungary, Slovakia and the Czech Republic during the first half of 2016. The Company’s financial year runs to 31 December and it reports its results in Euro.

B. System of Governance

Given the nature of TIG Bermuda (as described in section A.1), the system of governance described relates to that in place within the Company. The Company maintains a strong framework for the control and management of the business. This section describes the key committees and functions which serve to provide sound and prudent management of our operations.

C. Risk profile

This section provides information regarding our risk management processes, for each of the principal risks faced by the Group.

D. Valuation for solvency purposes

The Solvency II regulations require the Group to value assets and liabilities on a different basis to that used in the GAAP financial statements when assessing its solvency requirements. This section describes the main methods and assumptions used in the valuation.

E. Capital management

The Group holds capital, in excess of its regulatory requirements, to maintain its ability to pay its policyholders even if extreme events materialise. In order to assess its regulatory Solvency Capital Requirement, the Group uses the standard formula specified in the Solvency II legislation. This section summarises the capital held to meet the Group’s solvency requirement.

A. Business and Performance

A.1 Business

i. Business profile

Colonnade Insurance S.A. (“the Company”) is a Luxembourg insurer which is authorised to write all classes of non-life insurance business with the exception of class 10 (motor vehicle liability).

Through its branches, the Company offers a wide range of non-life insurance products, through personal and corporate lines, including property and liability insurance, household insurance, motor insurance (own damage), GAP¹ insurance and travel and accident insurance.

The Company’s guiding principle is to underwrite “quality” business and not to necessarily look for “volume”. Premium writings will be reduced in circumstances where unfavourable market conditions exist or when pricing does not compensate for the risk assumed.

TIG (Bermuda) Ltd. (“TIG Bermuda”) is an insurance company authorised in Bermuda which has not written any new or renewing insurance business for at least the last 7 years. At 31 December 2016, its net assets comprise a cash / investment portfolio of approximately EUR 1 million (with accruals of an immaterial value and nil technical liabilities). The Company’s 100% ownership share of TIG Bermuda represents its only direct or indirect participating interest.

ii. Significant business events

Acquisition of QBE’s Hungarian, Slovakian and Czech businesses

On December 16, 2014, Fairfax Financial Holdings Limited (“Fairfax”) entered into an agreement with QBE Insurance (Europe) Limited (“QBE”) to acquire QBE’s insurance operations in the Czech Republic, Hungary and Slovakia (the “QBE insurance operations”). *Fairfax is described overleaf.*

A new Luxembourg insurer, **Colonnade Insurance S.A.**, was established by Fairfax in July 2015 and branches of Colonnade were established in each of the Czech Republic, Hungary and Slovakia during the fourth quarter of 2015. The business and renewal rights of QBE’s Hungarian, Czech and Slovakian insurance operations were transferred to the Company on February 1, 2016, April 1, 2016 and May 2, 2016 respectively. On these respective dates, the staff working in the QBE branches transferred to Colonnade.

Acquisition of the renewal rights to AIG’s businesses in Hungary, Slovakia, Czech Republic, Poland, Bulgaria and Romania

In October 2016, it was announced that Fairfax will acquire renewal rights for the portfolio of local business written by the operations of American International Group, Inc. (“AIG”) in Bulgaria, Czech Republic, Hungary, Poland, Romania, and Slovakia (the “AIG business”) and assume AIG’s employees and certain operating assets in these countries.

It is intended that this business will be underwritten by the Company.

The transactions with respect to Czech Republic, Hungary and Slovakia closed in April 2017; the Bulgarian transaction closed in May 2017 and the transactions with respect to the remaining countries are expected to close during the course of 2017.

¹ GAP insurance covers the difference between the actual cash value of a vehicle and the balance owed on the financing (car loan, lease, etc.).

iii. Capital and solvency cover

The Group's SCR (standard formula) cover ratio stood at 136% at 31 December 2016. In order to maintain solvency levels whilst writing the AIG business, a schedule of further proposed capital injections during 2017 and 2018 has been established. During 2017 to date, further capital of EUR 46.0 million (cash) has been injected into the Company, consistent with the schedule.

iv. About Fairfax

The Company's shareholder is **Fairfax Luxembourg Holdings S.à.r.l.**, a company registered in Luxembourg.

The Company's ultimate parent is **Fairfax Financial Holdings Limited ("Fairfax")**, a major Canadian holding company whose common shares are listed on the Toronto Stock Exchange, and whose address is 95 Wellington Street West, Suite 800, Toronto, Ontario M5J 2N7, Canada.

Fairfax, through its subsidiaries, has an international insurance and reinsurance business which has a global underwriting reach with longstanding relationships and a broad product range. At each of its subsidiaries there is an experienced management team focused on underwriting discipline and prudent reserving. Management at these companies are committed to Fairfax's goals of underwriting profitability.

Fairfax (<http://www.fairfax.ca/>) is described in summary detail below:

- Significant player in the P&C industry with US\$9.5 billion in gross premium, US\$8.5 billion in equity capital and over 10,000 employees (as at 31 December 2016).
- Strong long-term relationships developed over 30 years and multiple cycles.
- Global territorial reach in both insurance and reinsurance - underwriting offices in over 30 countries.
- Over 140 discrete underwriting profit centers through our network of companies.
- Developed footprint in emerging markets (India, China, MENA, Brazil, South East Asia).
- Fairfax culture is well known and respected within the industry.

Fairfax's diversified operating platform is illustrated below:

From a European Union perspective, Fairfax has well established (re)insurance operations in the United Kingdom via its Lloyd's platforms (Brit, Advent and Newline), a London branch of Odyssey Re and the RiverStone run-off operations. The remaining European (re)insurance operations comprise Polish Re (Poland), branches of Odyssey Re in Paris and Stockholm, as well as Colonnade in Luxembourg (with existing branches in Slovakia, Hungary and Czech Republic and branches to be established in Poland, Romania and Bulgaria).

v. Summary Financial Performance

The Group's summary income statement for the year ended 31 December 2016 is set out below:

| Income Statement (EUR'000) | 2016 |
|--------------------------------------|----------------|
| Net earned premium | 7,516 |
| Claims Incurred | (2,976) |
| Net operating expenses | (13,478) |
| Underwriting result | (8,938) |
| Other income and charges | (340) |
| Loss before tax | (9,278) |
| Taxes | (80) |
| Loss for the financial period | (9,358) |

The loss for the financial year reflects the start-up nature of the Company's operations.

A.2 Underwriting Performance

The Company established branches in Hungary, the Czech Republic and Slovakia and commenced writing business in Hungary on 1 February 2016, in the Czech Republic on 1 April 2016 and in Slovakia on 2 May 2016.

During 2016, the Company wrote total gross premiums of EUR 16.7 million (across its three established branches in Hungary, Slovakia and Czech Republic). The premium volumes and combined ratio of 218.2% reflects the start-up nature of the Company's operations.

Given the start-up nature of the Company's operations, a commentary on the performance by line of business or territory is not considered meaningful.

A.3 Investment Performance

As at 31 December 2016, the Group's investment portfolio was held entirely in cash (circa EUR 24.1 million), as was the case throughout the entire period. Reflecting the prevailing low interest rate environment, the investment return recorded during the period was not significant.

A.4 Performance of other activities

There are no other activities to disclose.

A.5 Other information

i. Guarantee from Fairfax

The Company benefits from a guarantee provided to it by Fairfax, under which it guarantees the performance of all (re)insurance business written by the Company. Under the terms of this agreement, Fairfax undertakes to pay all valid claims in the event of insolvency of the Company. The agreement remains in force until and automatically terminates on 31 December 2017 (unless renewed or extended by Fairfax) and covers all policies issued or renewed prior to the date of termination of the agreement.

ii. Supervisory Authority

The Company is regulated in Luxembourg by the Commissariat aux Assurances (“CAA”) whose address is 7, boulevard Joseph II, L-1840 Luxembourg. TIG Bermuda is regulated by the Bermuda Monetary Authority (“BMA”) whose address is BMA House, 43 Victoria Street, Hamilton HM12, Bermuda.

iii. Auditor

The Company’s auditor is PwC whose address is 2 Rue Gerhard Mercator, 2182 Luxembourg.

iv. Employees

The average number of staff employed across the Company’s operations in Luxembourg, Hungary, Slovakia and the Czech Republic during 2016 was 175. TIG Bermuda does not have any employees.

v. Head office address

The Company’s head office address is Rue Eugene Ruppert 20, L-2453 Luxembourg, R.C.S. Luxembourg B 61 605. TIG Bermuda’s registered office is Canon’s Court, 22 Victoria Street, Hamilton HM EX Bermuda.

B. System of Governance

B.1 General information on the system of governance

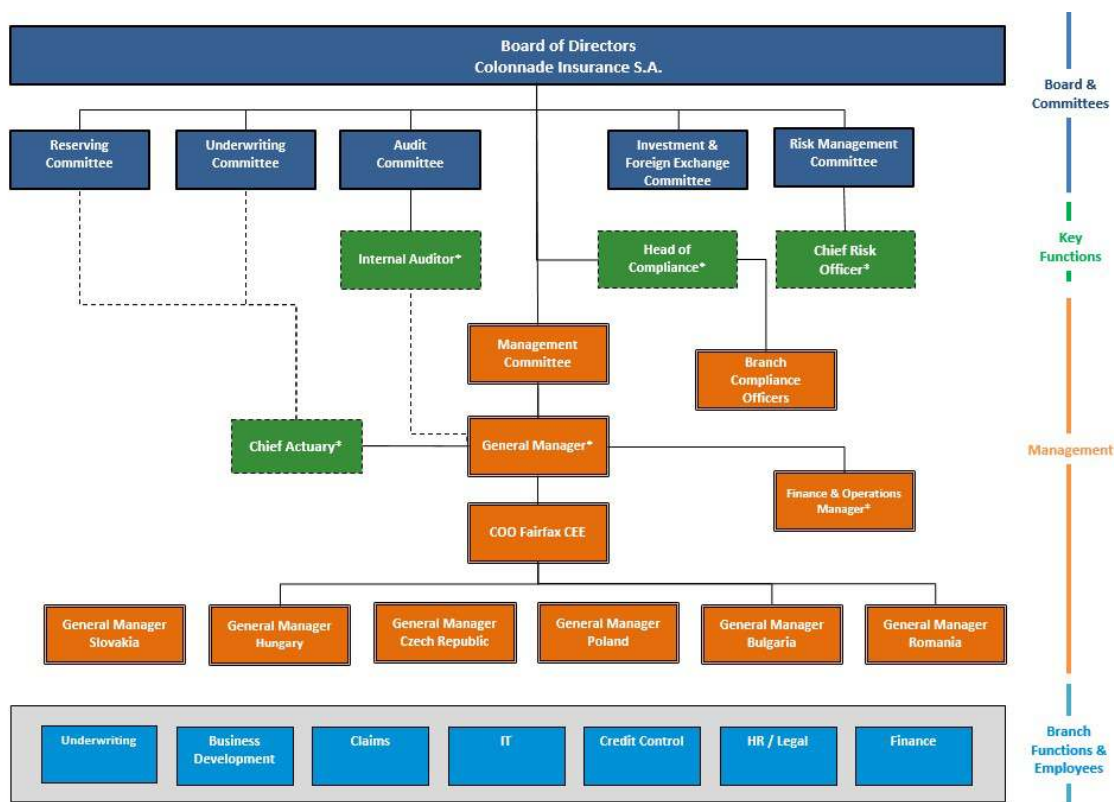

i. Introduction

Given the nature of TIG Bermuda (as described in section A.1), the system of governance described within section B relates to that in place within Colonnade Insurance S.A. (the “Company”).

The Company has implemented a system of governance which provides for sound and prudent management. Risk management, compliance, internal audit and actuarial functions which are consistent with the needs of Company’s operations have been established. The Company’s staff and directors have the skills, knowledge and expertise to fulfil their allocated responsibilities. The system of governance is therefore considered proportionate to the nature, scale and complexity of the Company’s business.

ii. Management and Governance Structure

The Company has a Board and, currently, four board committees being the Reserving Committee, Underwriting Committee, Investment & Foreign Exchange Committee and the Risk Management Committee (together with a Management Committee). The following diagram summarises the Company’s governance structure and the key function holders and management (this chart has been updated to reflect the creation of an Audit Committee, reflecting the increased scale of the Company’s operations, as well as the inclusion of branches to be established in Poland, Romania and Bulgaria during 2017).

The Board of Directors currently comprises five Directors: an executive Chairman, one executive Director and three independent non-executive Directors (listed overleaf).

The Board of Directors are:

- Mr. Ronald Schokking (Chairman)
- Mr. Frederick Gabriel (Independent)
- Mr. Marnix Wielenga (Independent)
- Mr. Leo de Waal (Independent)
- Mr. Jean Cloutier

Under the Board's terms of reference, the Board is required to meet at least four times a year.

The independent, non-executive Directors do not have any executive relationship with the wider Fairfax group. They bring a wide range of experience and expertise from both the insurance and general business sectors.

The Board oversees the conduct of the business and its senior management and is responsible for ensuring the maintenance of a sound system of internal control and risk management and for the approval of any changes to the capital, corporate and/or management structure of the Company.

iii. Remuneration

The Company's remuneration structures are designed to motivate delivery of the Company's key business strategies, create a strong performance-orientated environment and reward achievement of meaningful targets over the short- and long-term.

Variable elements of executive remuneration (such as discretionary bonuses) packages are subject to a maximum percentage of their fixed annual salary. Further, variable elements of remuneration for staff within controls functions (such as actuarial, risk, compliance and internal audit) are determined independently from the performance of the operational units and areas that are subject to oversight by these functions.

iv. Material transactions during the period

The Company received capital injections amounting to EUR 14 million from its immediate parent during 2016. There were no further material transactions during 2016 between the Company and its immediate and ultimate parents, the Board members or management.

B.2 Fit and proper requirements

The Company has adopted a Fitness and Probity policy to ensure that individuals who effectively run the Company or otherwise exercise control functions have adequate qualifications, knowledge and experience to enable sound and prudent management (fit) and are of good repute and integrity (proper).

Our Directors, senior managers and those exercising control functions must meet the following criteria, amongst others, to be deemed fit and proper:

- Possess appropriate experience, educational or professional qualifications;
- Display a high degree of competency in current and previous roles;
- Demonstrate at all times good integrity, honesty and sound ethical character;

The ongoing assurance of fitness and propriety of our Directors and senior managers is re-assessed annually. A register of all persons falling within the Fit and Proper regime is maintained by the Compliance function.

B.3 Risk management system including the own risk and solvency assessment

i. Risk Management Framework

The Company's Risk Management Framework ("RMF") has been designed to:

- Provide management and the Board of Directors with reasonable assurance that the organisation's business objectives will be achieved by aligning risk appetite and strategy, proactively responding to risks, reducing the number of operational incidents and losses, and identifying and managing cross-enterprise risks.
- Facilitate deployment of capital.
- Ensure appropriate corporate governance practices are in place and successfully respond to a changing business environment.
- Assist management in implementing a sound and risk-based internal control system and provide the risk reporting tools to be used to identify significant control lapses/weaknesses and monitor corrective action.
- Guide staff in understanding the risk assessment methodology and strengthen their risk awareness and capability to identify, manage and control business risks.
- Assist the internal audit function in implementing a risk-based audit process for their independent review of the Company's processes.

The key elements of the RMF are:

- **Identification:** Risk events, risks and relevant controls are identified, classified and recorded in the Company's risk register.
- **Monitoring:** Risks are assessed and controls are evaluated. On a quarterly basis the Risk Register is reviewed for any changes in the risk assessment (both inherent and residual).
- **Management:** The information resulting from risk identification and measurement is used to improve how the business is managed. For example, key risk indicators (KRIs) are monitored quarterly to provide early warning of any changes in the Company's risk profile.

The key categories of risk facing the Company include: insurance, market, credit, liquidity and operational risks. The key governance bodies involved in the risk management process in the Company are set out below:

- The **Board** has ultimate responsibility for the oversight of the business and setting the strategy and risk appetite.
- The responsibilities of the **Audit Committee (to be established)** will include monitoring the Company's financial reporting process; monitoring the effectiveness of the Company's systems of internal control, internal audit and risk management; monitoring the statutory audit of the statutory financial statements; and reviewing and monitoring of the independence of the statutory auditors.
- The **Reserving Committee** oversees the setting of the Company's reserves.
- The **Underwriting Committee** oversees the development of, and adherence to, the Company's Underwriting Policy.
- The **Investment & Foreign Exchange Committee** oversees the management of the Company's investment portfolio by Hamblin Watsa (a Fairfax company), ensuring compliance with the investment guidelines established by the Board.
- The **Risk Committee** oversees the Company's risk-management system.

- The objective of the **Management Committee** is to take decisions, or to establish the basis on which all decisions are taken, required to execute the strategy determined by the Board, including all major operational decisions.

The Company's strategy for managing its risks includes:

- Identifying and analysing risk through a disciplined risk management process;
- Mitigating, transferring or avoiding risks that do not fit our business objectives;
- Retaining risk within an agreed risk appetite with appropriate levels of capital.

Risk appetite

The Board sets the Company's risk appetite at an overall level and each of the key categories of risk. The risk appetite will be reviewed on an annual basis to ensure that it appropriately captures the risks faced by the Company, and that it aligns to the Company's business and strategic objectives.

The Board receives a quarterly update on performance against the risk appetites. Regular management team meetings and committee meetings taken place that monitor limits and implement remedial actions as required.

ii. Risk Management processes

This section summarises the Company's processes and tools to identify, measure, monitor, manage and report the risks to which the Company is exposed.

Risk identification

The following tools and processes are used in the risk identification process:

- **Risk Register:** The Chief Risk Officer maintains a Risk Register which ensures all risks and controls are recorded and categorised.
- **Monitoring of risk events:** All employees are required to report all actual and near-miss risk events to the Chief Risk Officer.
- **Emerging risk analysis:** The Board and senior management periodically review the potential for risks not yet on the register to adversely impact the Company. These risks are reviewed and monitored in the business, and then added to the Risk Register if material enough.

Risk measurement

The following tools and processes are used to quantify the risks faced by the Company:

- **Stress testing:** The Company performs stress testing as part of its ORSA process, and reports the results to the Risk Committee.
- **Qualitative assessments:** where identified risks are not quantifiable, a view on the likely materiality and nature of such risks is undertaken by the Chief Risk Officer. These risks are reported to the Risk Committee in the same way as quantifiable risks.

Risk management, monitoring and reporting

One of the key objectives of the RMF is to provide senior management and the Board with relevant risk information. The following processes and tools are in place to ensure risks are effectively monitored and escalated:

- **Risk policies:** The Company has developed policies for each of the key risk categories which set out the roles of each committee and the process to be followed to monitor and report risks.

- **Oversight by the Risk, Investment & Foreign Exchange and Reserving and Underwriting committees:** These Board-level committees, which meet quarterly, receive periodic updates from the Chief Risk Officer to ensure that risks are effectively monitored and reported.
- **Chief Risk Officer updates to the Board:** A quarterly update from the Company's Chief Risk Officer is provided which sets out the key changes to the Company's key risk indicators ("KRIs") and a summary of the key risk activities since the last update.

iii. Own risk and solvency assessment

Annually, or more frequently, if the Company's circumstances materially change, the Company prepares an ORSA. The objective of the ORSA is to enable the Board to assess its capital adequacy given its assessments of the risks facing the Company and to enable meaningful strategic decisions to be made.

The ORSA outcomes are used to facilitate strategic decision making. The capital management process is a key part of the overall ORSA process as capital considerations are critical in making key strategic decisions.

An annual ORSA report is produced which summarises the outcomes of the above process, in accordance with the full Solvency II requirements. This report is reviewed and approved by the Board, who have ultimate responsibility for the ORSA process.

B.4 Internal control system

i. Overview

The Company's internal controls framework is made up of:

- The control environment - the culture and organisational structures that support sound internal control;
- Risk assessment – to determine controls that should be implemented to manage identified risks to within tolerance levels;
- Control activities – the elements of effective control design and operation;
- Information and communication – reporting lines to report achievement of goals and adverse reporting to the Board and its sub-committees; and
- Monitoring and oversight - supporting the oversight and governance of internal control.

In order to ensure the ongoing effectiveness and efficiency of the control framework, the Company operates a "three lines of defence model".

Controls are the responsibility of the business and relevant line management, i.e. the 'first line of defence'. As the first line of defence, line management is responsible for monitoring day to day adherence to this framework within its area of jurisdiction. There is close interaction between management based in Luxembourg and those located in the Company's branch offices.

Assurance, or the 'second line of defence', is provided by employees who are independent from business line management. Assurance functions include Risk Management and Compliance. Second line of defence assurance functions monitor compliance to the control framework. Breaches are reported to the Board and the Risk Committee on an exceptions-basis as appropriate.

The third line of defence is provided by Internal Audit and the (to be established) Audit Committee.

Ultimate responsibility for implementing and monitoring the Internal Control Framework resides with the Board. The Internal Control Framework is reviewed and approved by management and the Board on an annual basis.

ii. Compliance

The Company has appointed a Luxembourg based Compliance Officer who works closely with staff at branch level and is responsible for ensuring that all external compliance obligations, and internal Fairfax requirements, are appropriately addressed.

The responsibilities of the Compliance Officer are carried out under a compliance programme that sets out its planned activities, such as the implementation and review of specific policies and procedures, compliance risk assessment, compliance testing, and educating staff on compliance matters. The compliance programme is risk-based and subject to oversight by the Board to ensure appropriate coverage and co-ordination among risk management functions.

The Compliance Officer reports on a regular basis to the Board on compliance matters. In the event that any compliance breaches or deficiencies have been identified, the Compliance Officer will report on the corrective measures recommended to address them, and on corrective measures already taken.

B.5 Internal audit function

The Company has appointed a Luxembourg based Internal Auditor. The Internal Auditor is responsible for evaluating the effectiveness and adequacy of the internal control system and other areas of governance within the Company.

Internal Audit activity is driven by a three year Internal Audit planning cycle which covers all areas of the Company's activities. A "rolling" three year Internal Audit plan, together with the proposed internal audit activities for the coming year, is approved by the Board annually. This utilises a risk based approach to ensure that the internal audit plan provides adequate coverage of business activities with a particular focus on the higher risk areas of the business.

The Internal Auditor is supported, as required, by **ffh** Management Services (based in Dublin). **ffh** Management Services, a Fairfax subsidiary, has extensive internal audit experience and provides internal audit services to a number of Fairfax subsidiaries.

B.6 Actuarial function

The Company's Luxembourg based Chief Actuary is responsible for setting the Company's technical provisions, which are developed in accordance with Fairfax Group reserving policies and local requirements (including Solvency II). The Chief Actuary is also a member of the Company's Reserving Committee and Underwriting Committee. Additionally, amongst other duties, the Chief Actuary is responsible for preparing an opinion on the Company's underwriting policy and the adequacy of the reinsurance arrangements in place as well as contributing to the effective implementation of the risk management system.

In discharging these duties, the Chief Actuary works closely with actuarial resources located in the Company's branches as well as other business functions; namely Underwriting, Finance, Risk Management, Claims and Operations.

B.7 Outsourcing

The Board of Directors are responsible for all of Colonnade's activities, irrespective of whether the function is outsourced or not.

Intra company outsourcing arrangements are subject to the same level of diligence and monitoring as third party service providers. Terms are negotiated on an arm's length basis.

A Fairfax group company, **ffh** Management Services, located in Ireland, provides IT Administration & Support services, including Business Continuity Management, to the Company and provides financial reporting, risk management (supporting the CRO in Luxembourg) and internal audit (supporting the Internal Auditor in Luxembourg) support as may be required.

At year end December 2016, the Company was solely invested in cash. However, any investment portfolio that the Company may hold in future periods will be managed by Hamblin Watsa Investment Counsel Ltd, a wholly owned subsidiary of Fairfax.

Furthermore, Fairfax's head office (in Toronto) provides legal, tax and tax planning, actuarial (as may be required) support to the Company.

Responsibility for overseeing each of the outsourced activities is assigned to an individual within the Company who has the requisite knowledge and experience.

The Company's outsourcing policy is reviewed and approved by both management and the Board each year and more frequently, if required.

B.8 Other information

All relevant information regarding the Company's risk profile is considered to be included in sections B1-B7 above.

C. Risk profile

Given the nature of TIG Bermuda (as described in section A.1), the risk profile described within section C (other than market, credit and liquidity) relates to that of Colonnade Insurance S.A. (the “Company”).

The Company’s activities expose it to a number of key risks which have the potential to affect its ability to achieve its business objectives. The main risks facing the Company’s business include insurance (reserving and underwriting), credit, market, liquidity and operational risks. The Company’s approach to managing these risks is as follows:

C.1 Insurance risk

i. Underwriting risk

Underwriting risk includes both the risk of inappropriate underwriting and inadequate pricing. The Company, since commencing operations earlier in 2016, is following the disciplined underwriting approach taken by the branches (under QBE ownership) historically, led by experienced teams of managers and underwriters. This philosophy and approach will continue.

Underwriting is subject to a number of protocols such as underwriting authorities, guidelines, rate monitoring and peer review. Underwriting is overseen by the Underwriting Committee, which monitors and reports on performance against plan.

Control structures are in place to mitigate the risk of accumulations of loss from catastrophic events and the Company is further protected by the reinsurance programme comprising a range of quota share and excess of loss contracts that cover the different lines of business written by the Company (for example, the Company’s net exposure to a natural catastrophe event is limited to EUR 2 million).

ii. Reserving risk

This is the risk that unpaid loss reserves prove to be inadequate. The Company has recorded gross reserves for unpaid losses of EUR 1.9 million (in addition to a gross unearned premium reserve amounting to EUR 8.5 million) in the Luxembourg GAAP financial statements for the year ended 31 December 2016.

The Company has appointed a Chief Actuary, who is based in Luxembourg, to assess reserving levels, working in close cooperation with underwriting and claims staff within each of the branches. Oversight of reserve setting is the responsibility of the Reserving Committee which meets at least quarterly. Fairfax’s group actuarial team in Toronto also reviews the final reserve selections.

C.2 Market risk

At 31 December 2016, the Group’s investment portfolio was comprised solely of cash (EUR 24.1 million, of which EUR 23.1 million was held by the Company). Therefore, the Company’s market risk exposure is not significant (and predominately results from currency risk exposure given that the Company underwrites contracts denominated in Czech Koruna, Hungarian Forints and Euros, whilst the cash balances are largely denominated in Euros).

C.3 Credit risk

This is the risk that one party to a financial arrangement will fail to discharge an obligation and cause the other party to incur a financial loss. The main sources of credit risk relate to:

- **Reinsurers:** through the failure to pay valid claims against a reinsurance contract held by the Company.
- **Premium debtors:** where a broker, intermediary or policyholder fails to pass on premiums or claims collected or paid on behalf of the Company.
- **Investments:** through the issuer default of all or part of the value of a financial instrument or the market value of that instrument.

Reinsurance credit risk

Credit risk from reinsurers is controlled through only transacting with reinsurers that meet certain minimum requirements and that have been approved by the Fairfax Reinsurance Security Committee in advance.

At 31 December 2016, the Company's balance sheet exposure to reinsurers is limited and relatively small, the largest exposure is Swiss Re who provided 35% of capacity on the Risk XL and Cat XL contracts in 2016 (which amounts to less than EUR 0.1 million of premium).

Premium debtors credit risk

The Company's premium debtors arising from direct insurance and reinsurance operations are EUR 4.6 million and EUR 0.8 million respectively. Debtors are valued at the lower of their nominal or estimated realisable value. The credit risk associated with these receivables is considered low.

Investment credit risk

Credit risk relating to financial investments and cash and cash equivalents is monitored by the Investment & Foreign Exchange Committee, which is responsible for the management of investment credit risk.

At 31 December 2016, the Group has an exposure to credit risk in relation to cash held with credit institutions (EUR 24.1 million). Cash is placed, in accordance with established policy, with credit institutions having a rating of at least A-.

C.4 Liquidity risk

This is the risk of encountering a difficulty in meeting obligations associated with liabilities as they fall due.

The Group monitors the levels of cash and investments to ensure liquidity requirements are addressed. The Group's exposure to liquidity risk is considered low, given the significant cash balances held at 31 December 2016 (EUR 24.1 million) and throughout the reporting period.

C.5 Operational risk

Operational risk is defined as the risk of loss resulting from inadequate or failed internal processes, people, and systems, or from external events.

Managing day-to-day operational risk is the responsibility of the line managers, both within Luxembourg and the branch offices. This includes responsibility for managing claims risks through policies and procedures including defining authority levels, protocols for management oversight, an automated system to support and report on major claims activity and a formal review process for major claims. The Company's investment managers are responsible for establishing processes and

controls to ensure an effective risk management framework with regard to investments. Operational risks through exposures to key counterparties like banks are managed by the Luxembourg management team whereas risks arising from relationships with brokers and other local counterparties are the responsibility of local branch managers.

C.6 Other material risks

As at 31 December 2016, the execution risk associated with the acquisition of the renewal rights to the AIG businesses (as described in section A.1) was significant. However, an extensive programme of work was undertaken, which commenced in 2016 and continued into 2017, to ensure the Company's readiness to on-board the AIG business, employees and assets by the transaction closing date in each of the relevant countries.

C.7 Other information

Off-balance sheet positions

The Company does not transfer any risk to off-balance sheet or Special Purpose Vehicles.

D. Valuation for solvency purposes

Under Luxembourg law, the Company is exempt from the requirement of producing group consolidated financial statements. The Company prepares its financial statements on a going concern basis and in accordance with Luxembourg GAAP ("Lux GAAP").

At 31 December 2016, the Company's Lux GAAP financial statements recorded shareholder's equity amounting to EUR 26.4 million. This consists of EUR 9.5 million of subscribed capital (of which EUR 7 million was unpaid), a share premium account of EUR 27.8 million, a legal reserve of EUR 0.95 million and retained losses of EUR 11.9 million.

The Group's Solvency II balance sheet, own funds and SCR are prepared using an accounting consolidated approach.

The difference between the shareholder's equity in the Company's non-consolidated Lux GAAP financial statements (EUR 26.4 million) and the excess of assets over liabilities on the consolidated Group Solvency II balance sheet (EUR 17.3 million), as set out in the appendix, amounts to EUR 9.1 million and results from the differing valuation / balance sheet treatment of certain assets and liabilities, such as technical provisions. These are described below.

D.1 Assets

The differences in valuation / balance sheet treatment of assets between the Company's non-consolidated Lux GAAP balance sheet and the consolidated Group Solvency II balance sheet are discussed below.

i. Subscribed, uncalled and unpaid share capital (EUR 7 million)

Subscribed, uncalled and unpaid share capital of EUR 7 million is shown as an asset and included within shareholder's funds on the Lux GAAP balance sheet.

Under Solvency II rules, uncalled and unpaid share capital is considered "ancillary own funds" (an off balance sheet item) and, subject to the approval of the regulator, may be used to meet a company's solvency capital requirement (subject to certain limits). The CAA has given its approval to the Company for its use of the EUR 7 million subscribed, uncalled and unpaid share capital as Tier 2 ancillary own funds.

ii. Investment in affiliated undertakings and participating interests (EUR 1 million)

In its non-consolidated Lux GAAP financial statements, the Company has recorded an investment in TIG Bermuda as a separate asset to the value of EUR 1 million on the balance sheet. In contrast, the underlying assets and liabilities on the TIG Bermuda balance sheet (which net to approximately EUR 1 million) are included on the consolidated Group Solvency II balance sheet.

iii. Deferred Acquisition Costs (EUR 1.9 million)

Deferred Acquisition Costs of EUR 1.9 million on the Lux GAAP balance sheet are fully earned under Solvency II rules, in line with the full earning of associated gross Unearned Premium reserve (EUR 8.5 million).

iv. Intangible assets (EUR 0.7 million)

For Solvency II purposes, intangible assets recognised in the Lux GAAP financial statements (being policy data rights; software; and concessions, patents, licences and trademarks) at EUR 0.7 million have been ascribed a nil value.

v. Reinsurance recoverables (EUR 0.5 million lower on Solvency II balance sheet)

EUR 0.75 million of ceded UPR on the Lux GAAP Balance Sheet is recognised within the technical provisions on a Solvency II basis.

vi. Deferred Tax Asset (EUR 1.1 million on Solvency II balance sheet)

The Solvency II balance sheet includes a deferred tax asset of EUR 1.1 million, arising from trading losses incurred at the level of the Company's branches, which is not allowable under Lux GAAP rules.

D.2 Technical provisions

i. Solvency II Technical Provisions as at 31 December 2016 (EUR 0.1 million higher (gross) on Solvency II balance sheet)

A breakdown of the Group Solvency II technical provisions as at 31 December 2016 is provided below. Given the start-up nature of the Company's operations, and the fact that TIG Bermuda has nil technical provisions at the valuation date, an analysis by line of business is not considered meaningful.

| EUR'000 | Best Estimate | Risk Margin | Total |
|--------------------------|----------------------|--------------------|---------------|
| Gross | 7,543 | 3,082 | 10,626 |
| Reinsurers' share | 487 | 0 | 487 |
| Net | 7,057 | 3,082 | 10,139 |

ii. Reserving Process and Governance

The Company's reserving process to determine the technical provisions on GAAP and Solvency II bases broadly comprises the following steps, as part of a robust and rigorous process for setting reserves:

- Determination and recommendation of ultimate claims by the Actuarial Function;
- Review/validation by the Fairfax actuaries, Chief Operating Officer and branches;
- Determination of the technical provisions to adopt in the GAAP/Solvency II technical provisions; and
- Review and approval by the Reserving Committee / Board.

iii. Key methodology and assumptions used to determine ultimate premiums and claims

To determine the estimate for ultimate premiums and claims, analysis is undertaken separately for each line of business.

For the majority of the classes of business, the following standard actuarial projection techniques are used to calculate ultimate premiums and claims:

- Basic Chain Ladder (based on paid and incurred claims)
- Bornhuetter-Ferguson (based on paid and incurred claims)
- Initial Expected Loss Ratio

Claim experience on the most recent years of account is relatively immature. As a result, the Basic Chain Ladder methods produce estimates with a relatively higher level of uncertainty. When projecting estimates for these years of account, the Bornhuetter-Ferguson and Initial Expected Loss Ratio methods are used instead.

Specific adjustments may be made to projected ultimate claims at either a class or an individual claim level. This may be due to a known large loss and/or loss experience on a particular contract.

When choosing between methods, the maturity of each year of account, volume of data, benchmark information and other business-specific issues that are known about at the time of valuation are taken into account.

iv. Key methodologies and assumptions used to determine best estimate technical provisions on a GAAP and Solvency II basis

Having determined the ultimate premiums and claims to form the basis for the technical provisions, a number of additional material assumptions are required to determine the technical provisions on a GAAP and Solvency II basis:

- **Writing and earnings patterns** – used to determine the level of earned and unearned premiums. These are based on the inception and expiry dates of the underlying contracts.
- **Expense provisions** – an Unallocated Loss Adjustment Expenses (ULAE) provision is held within the GAAP technical provisions. In addition, expense provisions are required within the Solvency II technical provisions in respect of premiums, claims and investments which represent the on-going servicing of the business included in the valuation.
- **Payment patterns** – used to determine the cashflow profiles. When calculating technical provisions to demonstrate solvency on a Solvency II basis, the time-value of money must be allowed for. This requires the estimation of timing and quantum of future cashflows associated with the technical provisions. These cashflows are then discounted back to present value using risk-free yield curves.
- **Risk free yield curves** – by currency and based on those set by EIOPA.

A Risk Margin, being the expected cost of capital to support the run-off of the technical provisions, is also added and is calculated based on the standard formula.

v. Reserve Uncertainty

The key uncertainties surrounding the technical provisions relate to the ultimate unpaid claims reserves. These uncertainties are present on both a financial accounting and Solvency II basis. However, in determining the ultimate unpaid claims reserves, it was established that the Company was not exposed to any individual or aggregation of large losses which increased the uncertainty of

the Company's reserves beyond the normal range of uncertainty for insurance liabilities at this stage of development.

vi. Impact of Reinsurance

The impact of reinsurance on the Solvency II technical provisions is quantified above. As this is small relative to the gross technical provisions, the impact of reinsurance is expected to be limited.

vii. Material differences between technical provisions on GAAP and Solvency II bases

The key differences between the GAAP and Solvency II technical provisions are:

- **Profit on Unearned Premiums** – the UPR is based on 100% of unearned premium on a GAAP basis, whereas under Solvency II, profit relating to the unearned premium is recognised at the relevant expected loss ratio.
- **Additional Solvency II loads** - in addition to the Unallocated Loss Adjustment Expenses (ULAE) and bad debt held on a GAAP basis, provisions are required in respect of premiums, claims and investment expenses.
- **Discounting** - the impact of discounting using yield curves provided by EIOPA as at 31 December 2016.
- **Risk Margin** – the load required for the Risk Margin as at 31 December 2016.

In valuing the Solvency II technical provisions:

- There are no matching adjustments applied.
- There are no volatility adjustments used.
- There are no transitional risk-free interest term structures applied.
- There are no transitional deductions applied.

D.3 Other liabilities

For all other liabilities other than the technical provisions, there are no valuation differences between the GAAP and Solvency II bases.

D.4 Alternative methods for valuation

There are no alternative valuation methods to disclose.

D.5 Other information

All relevant information regarding the Company's valuation methodologies is considered to be included in sections D1-D4 above.

E. Capital management

E.1 Own funds

i. Policy

The Company's capital policy sets out capital requirements and principles of funding and states the importance of ensuring that both the Group and Company are sufficiently capitalised at all times and complies with the Solvency II requirements. Responsibility for ensuring compliance with this policy rests with the Board of the Company.

ii. Capital requirements

The Solvency Capital Requirement ("SCR") is the amount of capital required to ensure continued solvency over a one year time frame with a probability of 99.5%. The Group calculates its own funds and SCR using an accounting consolidation-based method. The Group SCR is calculated using the standard formula specified in detail in the Solvency II legislation.

The Minimum Capital Requirement (MCR) is not defined at the Group level under Solvency II. The minimum consolidated Group SCR is calculated as the sum of the MCRs for the Company and TIG Bermuda (based on its local minimum capital requirement).

Under Solvency II, capital is referred to as Own Funds and a distinction is made between Basic Own Funds (BOF) and Ancillary Own Funds (AOF). Capital starts with the excess of assets over liabilities on the Group Solvency II balance sheet (EUR 17.3 million at year end 2016) to which qualifying subordinated debt are added (the Group has no subordinated debt) to arrive at Basic Own Funds. Off balance sheet items that may absorb losses are known as Ancillary Own Funds.

The Own Funds are classified into tiers of Own Funds and restrictions are applied to limit the extent to which the components of Own Funds can be used to meet the capital requirements (SCR and MCR).

iii. Own Funds structure as at 31 December 2016

The composition and total available own funds for the Group at 31 December 2016 is set out below. Whilst Basic Own Funds may fall within one of three tiers, Ancillary Own Funds are only permitted to form part of Tier 2 or 3 reflecting the fact they are not on the balance sheet.

| EUR'000 | Tier 1 Unrestricted BOF | Tier 2 Ancillary | Tier 3 BOF | Total |
|-----------------------------------|-------------------------------|---------------------|---------------|---------------|
| Paid up share capital | 2,500 | | | 2,500 |
| Uncalled and unpaid share capital | | 7,000 | | 7,000 |
| Share Premium | 27,876 | | | 27,876 |
| Legal reserve | 950 | | | 950 |
| Deferred Tax Asset | | | 1,080 | 1,080 |
| Reconciliation reserve | (15,073) | | | (15,073) |
| Total Own Funds | 16,253 | 7,000 | 1,080 | 24,333 |

The Company's paid up share capital, share premium and legal reserve have been classified as Tier 1 Group capital. The reconciliation reserve is also classified as Tier 1 Group capital in accordance with the Solvency II guidelines.

The Group has also accounted for EUR 7 million of unpaid share capital recorded by the Company as eligible own funds at 31 December 2016. Under Solvency II rules, unpaid share capital is considered “ancillary own funds” and is eligible (subject to certain limits) given the approval of the regulator. The CAA has given its approval to the Company for its use of the EUR 7 million of unpaid share capital as ancillary own funds. The unpaid share capital is classified as a Tier 2 ancillary own funds item and is eligible to cover the Group’s SCR, but not minimum consolidated Group SCR, at 31 December 2016.

The reconciliation reserve has been calculated as follows:

| Reconciliation reserve | EUR’000 |
|-----------------------------------|-----------------|
| Excess of assets over liabilities | 17,333 |
| <i>Less:</i> | |
| Paid up Ordinary Share Capital | (2,500) |
| Share Premium | (27,876) |
| Legal Reserve | (950) |
| Deferred Tax Assets | (1,080) |
| Reconciliation Reserve | (15,073) |

iv. Eligible Own Funds at 31 December 2016

The classification into tiers is relevant to the determination of eligible own funds – being the own funds that are eligible to cover the SCR and the minimum consolidated Group SCR.

The table below shows the amount of eligible own funds to cover the SCR and MCR by tier:

| EUR’000 | Total eligible own funds | Tier 1 Unrestricted BOF | Tier 2 Ancillary | Tier 3 BOF |
|----------------------------------------------------------------------------|--------------------------|-------------------------|------------------|------------|
| Total eligible own funds to meet the SCR | 24,333 | 16,253 | 7,000 | 1,080 |
| Total eligible own funds to meet the minimum consolidated group SCR | 16,253 | 16,253 | 0 | 0 |

EUR 16.3 million (66.8%) of the Group’s eligible own funds are unrestricted tier 1 capital. This consists of the Company’s paid up share capital, share premium, legal reserve and the Group’s reconciliation reserve.

v. Eligible Own Funds to cover capital requirements (SCR and MCR)

The table below presents the ratio of eligible own funds that the Group holds to cover its capital requirements at 31 December 2016.

| EUR'000 | 2016 |
|-------------------------------------------------------------|-------------|
| Group SCR | 17,840 |
| Minimum consolidated group SCR | 5,408 |
| Capital available for Group SCR | 24,333 |
| Capital available for Minimum consolidated group SCR | 16,253 |
| Ratio SCR | 136% |
| Ratio MCR | 301% |

E.2 Solvency Capital Requirement (“SCR”) and Minimum consolidated Group SCR

The Group uses EIOPA’s Solvency II Standard Formula to calculate its SCR. It does not use Company specific parameters and does not use simplified calculations in its computation. The table below sets out the capital requirements for each risk module of the Standard Formula..

| Net capital requirement for each risk module (EUR'000) by entity | The Company | TIG Bermuda | Diversification | Group |
|------------------------------------------------------------------|---------------|-------------|-----------------|---------------|
| Non-life underwriting risk | 15,906 | 0 | 0 | 15,906 |
| Life underwriting risk | 0 | 0 | 0 | 0 |
| Health underwriting risk | 3,141 | 0 | 0 | 3,141 |
| Market risk | 410 | 252 | (252) | 409 |
| Counterparty default risk | 2,151 | 65 | (65) | 2,151 |
| Diversification | (4,012) | (42) | 42 | (4,012) |
| Basic Solvency Capital Requirement | 17,595 | 275 | (275) | 17,595 |
| Operational risk | 245 | 0 | 0 | 245 |
| Solvency Capital Requirement (“SCR”) | 17,840 | 275 | (275) | 17,840 |

As at 31 December 2016, the main component of the Group’s SCR is non-life underwriting risk, particularly premium risk, in expectation of the significantly increased premiums to be written in 2017, including the AIG business. Also included within non-life underwriting risk is a catastrophe risk charge which relates relating primarily to flood and earthquake exposures.

The other components of the Group’s SCR as at 31 December 2016 are market risk, which is predominantly currency risk related; counterparty risk which largely relates to the cash held and premium receivables; health underwriting risk, which is in respect of medical expense business; and operational risk.

E.3 Use of the duration-based equity sub-module in the calculation of the Solvency capital requirement

As the Group does not write life insurance business, the duration-based equity risk sub-module set out in Article 304 is not relevant for the Group.

E.4 Difference between the standard formula and any internal model used

As the Group does not utilise an internal capital model, this is not relevant.

E.5 Non-compliance with the SCR or minimum consolidated Group SCR during the period

There has been no non-compliance with the minimum consolidated Group SCR or SCR during the reporting period, and the Group is expected to remain compliant going forward.

E.6 Other information

All relevant information regarding capital management has been included in sections E1-E5 above.

F. APPENDICES

S.02.01 – Balance Sheet (EUR)
